

PRAJWAL SHETTER

MCA STUDENT

Phone: (+91)9902142924 — **Email:** prajwalshetter@gmail.com — **Location:** Bengaluru, India

LinkedIn: www.linkedin.com/in/prajwal-shetter — **GitHub:** <https://github.com/PrajwalShetter>

OBJECTIVE

Enthusiastic MCA student with a strong foundation in Java, SQL, and web technologies. Seeking an entry-level Software Developer role to apply my technical skills, learn from industry professionals, and contribute to organizational success.

SKILLS

Programming Languages: Java (Core-java, OOP's, Exception Handling, Collections Framework, java-8 features)

Frameworks & Libraries: Lombok, Servlet, Spring framework- MVC Architecture

Database Management: MySQL, JDBC, Hibernate-JPA

Web Technologies: HTML, CSS, JavaScript, Bootstrap, JSP

Tools: IntelliJ IDEA, VS Code, Git and GitHub, Maven, Workbench

Soft Skills: Communication, Problem Solving, Teamwork, Time Management

EDUCATION

MCA -- Master of Computer Application

Amity University, Bengaluru

CGPA: 8.6

BCA -- Bachelor of Computer Applications

IBMR College Hubli (August 2024)

CGPA: 8.80

INTERNSHIP

Software Intern | X-WorkZ

FEB2026 – SEP 2026

- Gained hands-on experience in Core Java, OOP, Collections, Exception Handling, Java 8 features, SQL, and MySQL.
- Developed and worked on web-based applications using JSP, Servlets, JDBC, Hibernate-JPA, HTML, CSS, JavaScript, and MVC architecture.
- Practiced CRUD operations, database integration, debugging, and layered application development using DAO, Service, Controller, and DTO components.

PROJECTS

- Event Management System | Java, JDBC, MySQL

- Built an Event Management System using Core Java, JDBC, and MySQL to manage Admin, Client, Category, and Event information.
- Implemented CRUD operations, PreparedStatement, transactions, input validation, and foreign-key relationships.
- Followed an MVC-inspired layered architecture using DTO, DAO, Service, Controller, and Runner layers.
- Gained practical experience in Java, OOP, JDBC, SQL, MySQL, and database management.

- PizzaHub – Online Pizza Ordering System | Java, JSP, Servlets, Hibernate-JPA, MySQL

- Developed a web-based pizza ordering application using Java, JSP, Servlets, Hibernate-JPA, and MySQL with an MVC architecture.
- Implemented an Admin module to add, update, delete, and manage pizza details, along with employee information management.
- Developed user functionality to browse pizzas, filter products based on category, size, and price, and place orders.
- Designed and integrated server-side processing and JSP-based UI pages for handling user requests, data management, and application workflows.
