SKILLS

- Programming Languages: Python, Java, C, C++
- Database: SQL,
- Tools: VS Code, Google Colab
- Data science and Analytics: NumPy, pandas, Matplotlib, seaborn, Scikit-learn, TensorFlow
- Data Engineering Concepts: ETL Process, Data Pipelines, PySpark (basic)
- Others: MS Office, Tally.

HOBBIES

- Drawing
- Cycling
- Movies

OBJECTIV

- Enthusiastic MCA student with strong analytical and programming skills, seeking an entry-level role in Data Engineering or Data Science to apply Python, SQL, and cloud knowledge in building data pipelines and deriving actionable insights.

EDUCATION

- **MCA** 2024-2026
Amity University| Bengaluru
CGPA :8.7
- **Bachelor of Computer Application** 2021-2024
IBMR BCA College | Hubli
CGPA :8.9
- **PUC** 2019-2021
Y.B. Annigeri College | Dharwad
Percentage: 89%

CERTIFICATES

- **C# Programming** — Simplilearn Learned the fundamentals of C# language, including OOP concepts, data structures, and .NET basics.
- **Operating System Fundamentals** — Covered OS concepts such as process management, memory allocation, and file system structure.

PROJECTS

- **Malware Classification using Deep Learning**
Developed a model to classify malware samples into families using Python, TensorFlow, and CNN algorithms, improving detection accuracy and supporting security analytics.
- **Employee Data Visualization using Power BI**
Developed an interactive Power BI dashboard to visualize employee data, including performance, salary, and department insights. Delivered actionable analytics and visual reports for workforce analysis.
